## Summary

Dedicated and efficient full stack developer with 6.5+ years of experience in creating and designing scalable webapplications. Currently, I'm working with Credit Suisse and responsible for developing workflows using Java and React to improve user experience and simplify tedious process.

## Education

JSPM RSCOE, Pune University

B.E., Electronics & Telecommunication

Pune, IN

Jul'11- Jun'15

## Experience

Credit Suisse

FULL-STACK DEVELOPER

Pune, IN

Apr'18-Present

- Worked on the survey/research web application that is subject to send surveys, collect data and show insights.
- Worked in developing new web application that will replace existing blocking legacy client management workflows.
- Managed several **micro-services** like dashboard portal, task management system, reporting and sentiment analysis.
- Developed task dashboard that can support more than 20+ filters, sharing to sub-accounts, multiple analytical menus and widgets using **React JS**, **Styled Components** and **REST API**.
- Implemented systems for Front office users that will reduce manual work by 70% using **Spring Boot & React**.
- Minimise portfolio blocking up to 90% by designing and developing end to end workflow functionality which also resulted in minimising third party tool dependancy.
- Provided low and high-level design inputs like usage of design patterns, refactoring code base, best coding practices and technological solutions.
- Used libraries like **Swagger**, **Actuator & SonarQube** for better understanding and to find potential threat.

Sears Holding

SOFTWARE DEVELOPER

Pune, IN

Dec'17-Jan'18

- Worked on enhancement of existing application by building new requirements using **Spring Boot**, **Hibernate**, **Jenkins**, **Maven**.
- Developed REST APIs, handled Database calls to store data in Oracle, ensured coverage by writing unit and integration test cases, configured environment-specific properties.
- Implemented dispute cycle and rules using **REST API**, MVC Architecture and reduced API response time under one second.

Syntel

TRAINEE ENGINEER

Pune, IN

Nov'16-Jan'20

- Worked on ACM(Access Control Module) system that is responsible to prevent unauthorised access to system dynamically based on business requirements by utilizing technologies like **Spring Boot**, **Jquery**, **Jenkins**, **AWS**.
- Developed REST APIs, handled Database calls to store data in Oracle, ensured coverage by writing unit and integration test cases, configured environment-specific properties.
- Reduced human from 15 to 2 by developing TransitManagement system to manage company employee transit.
- Handled code base of various application till production environment and resolved the issues.

## Skills
